

OCA Learn

AHow can I find other students on OCA Learn?

To find students who are studying your current unit, access the course page from 'My Courses' and select the 'Course Dashboard' option located beneath the 'Contents' menu on the left, as shown below.

Course Dashboard

Select the '# Participants' link to view a list of current students enrolled to your unit. Clicking on a student name will direct you to their profile page where you can view their short biography / introduction if the student has chosen to write one.

You can also find fellow students by accessing the Department Space for your programme from 'My Courses' and again, select 'Course Dashboard' followed by the '# Participants' link; this will reveal a list of all current students on your degree pathway.

Within the Department Space for your degree pathway, you will also find cross-unit seminars and study groups to join alongside your peers, these can usually be found under the 'Group Work' section.

You may also find it helpful to access the OCA Discuss forum – discuss.oca-student.com – that exists outside of OCA Learn where many students connect through threads and find existing groups.
